

Precise Energy Control, Seamless Lifting
Perfected with the sophistication of Magnetic HIFU technology

FROM **BROAD LINES** TO **FINE DETIALS**

CONTLEX SENSE

CONTLEX SENSE

Unlock the power of high-intensity focused ultrasound (HIFU) for visibly firmer, tighter skin. By delivering precise thermal energy (65–80°C) deep into the SMAS layer, HIFU triggers an immediate lifting effect—naturally stimulating collagen production for long-lasting rejuvenation. Feel the difference as science meets innovation to redefine your beauty. Experience a non-invasive lifting solution designed to tighten, sculpt, and restore—all without downtime. Your journey to youthful, radiant skin starts here.

Key Features

Dual Handpiece System

Maximized treatment efficiency with LINE-Type and PEN-Type handpieces, offering two distinct functions.

Magnetic Motion Control System

- The first-of-its-kind magnetic control system for precision control.
- Precisely controls the transducer through a magnet-based coupling mechanism.

Bi-Directional Energy Emission

The LINE-Type handpiece reduces treatment time with its efficient bi-directional energy delivery.

Safe & Precise Treatment

The PEN-Type handpiece allows for delicate and precise procedures, even in narrow and detailed areas.

Dual Wave Dot Technology

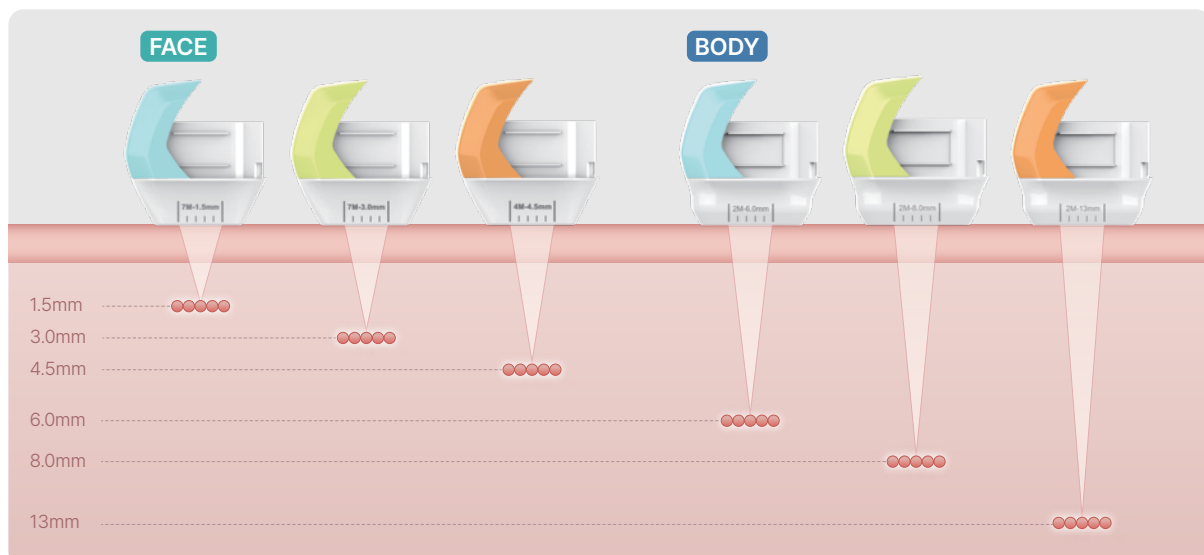

- Ensures a seamless dot formation system without gaps.
- Achieves cross-pattern dot formation for enhanced results.

Tailored Lifting with Dual Handpiece Technology

Cartridge Selection

Energy Penetration Depth

New Technology Key Point Top3

This is more than just a standard HIFU line-type system BREAKTHROUGH IN LIFT TECHNOLOGY

Experience a new dimension of precision, effectiveness, and innovation for superior lifting results.

Bi-Directional Energy Delivery

Faster, More Precise, More Advanced

- Revolutionary Line-Type Cartridge with Bi-Directional Shot Technology.
- Creates dot-pattern thermal coagulation points, cutting treatment time in half!!

Conventional Line Cartridge
Single-Directional Emission

NEW

Next-Generation Line Cartridge
Bi-Directional Emission

Bi-Directional

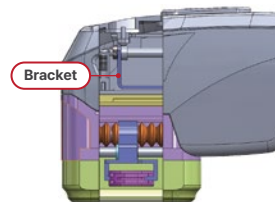

MMC System

Magnetic Motion Control

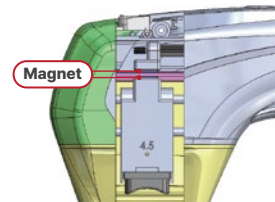

Patent Pending

Precision & Stability with Advanced Magnetic Technology

- Accurate Magnetic Focus Control – Ensures uniform energy delivery through a powerful magnetic coupling system.
- Leak - Proof & Optimized Cooling Design – Delivers a stable and safe treatment experience with enhanced thermal regulation.

Conventional Control

Magnetic Motion Control

DWD Technology

Dual Wave Dot

Precision, Versatility, and Superior Lifting

Break free from conventional HIFU limits with **CONTLEX^{SENSE}** – delivering stronger, more effective lifting!!

- Focusing Dot System – Delivers precise, shot-by-shot accuracy.
- Dual Wave Dot Technology – Covers treatment areas thoroughly like a line-type system.
- Customizable Modes – Switch between dot and line treatments for tailored results.

Dual-Shot Precision for Line-Like Thermal Coagulation

CONTLEX SENSE

SPECIFICATION

Power	AC 100~240V, 50/60Hz
LCD	12.1 inch TFT touch screen
Device dimension (mm) Device only	308.7(W) X 359.2(L) X 209.6(H)
Weight (kg) Device only	5.5kg(Main unit), 20kg(cart)
Power Consumption	MAX 100VA
Cartridge Types	Depth 1.5mm, 3.0mm – 7MHz
	Depth 4.5mm – 4MHz
	Depth 6.0mm 8.0mm, 13.0mm – 2MHz
